

New Equipment Training

Important:

The USA AAS is not the final authority of new equipment approval for airborne operations.

Coordination

Units receiving or testing new equipment not covered in the 82nd Airborne Division ASOP or Master Jumpmaster Updates should first coordinate with the Tower Committee Chief at 396-9023 prior to contact Airborne Special Operations Test Directorate (ASOTD).

Services

USA AAS will conduct specialized training as equipment is fielded to train the Paratrooper and/or train the Jumpmaster in rigging and JMPI of that new piece of equipment.
